

WOOD BURNING FIREPLACES

- Green Technology
- EPA Phase 2 Qualified
- Affordable

World's Cleanest Wood Burning Fireplaces!

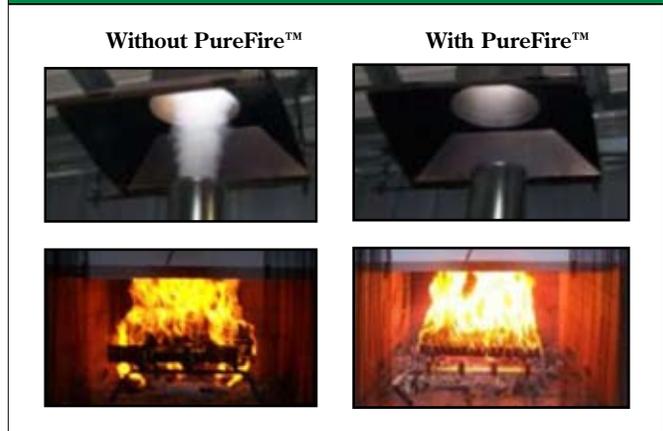

Traditional Wood Burning Looks, Outstanding Clean Burning Performance

Features and Benefits:

- **Affordable**
 - After market HearthCATs™ have an installed price of \$650.
 - FMI PureFire™ wood burning fireplaces cost thousands less than other fireplaces meeting the same standards, and are only hundreds more than a non-EPA qualified wood fireplace.
- **Effective**
 - Reduces current particulate emissions by approximately 75%. See chart for illustration.
 - Virtually eliminates carbon monoxide (including CO from gas logs)
 - After Market Product
 - * Installs in less than 45 minutes
 - * Maintenance free – no cleaning or special care required
- **Easy – Maintenance Free**
 - Ours is a passive system. Burn a fire the same way you always have. No special requirement.
 - Aesthetically neutral – you can't see it after it's been installed.

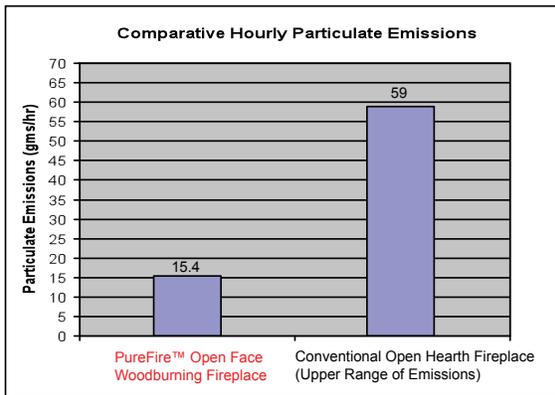

Open Face Fireplace After 20 Minutes Operation

*PureFire™ catalyzes all organic compound (PM and CO)

*Allows cool ambient air to bypass catalyst

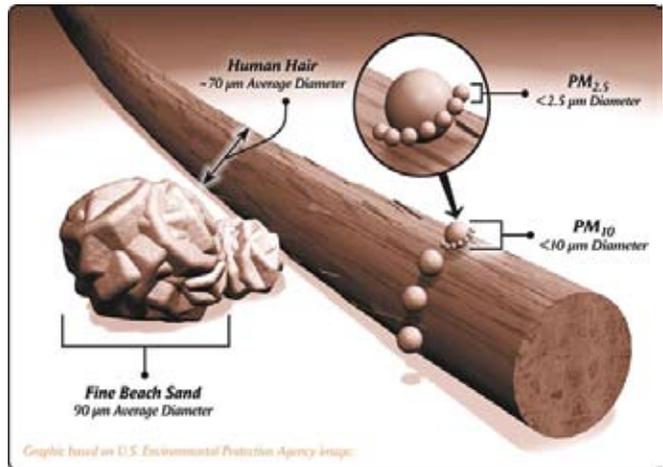

PureFire™ Reduces Particulates by Approximately 75%

g/kg conversion to grams per hour

*g/kg multiplied by the quantity of wood burned (in kilos) equals grams per hour. The average kilos burned per hour is 4.1 (as tested by OMNI for EPA)

World's Cleanest Wood Burning Fireplaces!

EPA Standard to stop matter between PM 10 to PM 2.5, PureFire™ Technology pulls out matter down to PM 2.5!

Calculated on Pounds of Particulate Matter per Fireplace per year

Note: Of the assumed 50 million wood burning fireplaces in the U.S., approximately 1 million tons of particulate matter are produced each year.
