

VersaFire® Direct-Vent Fireplace Systems

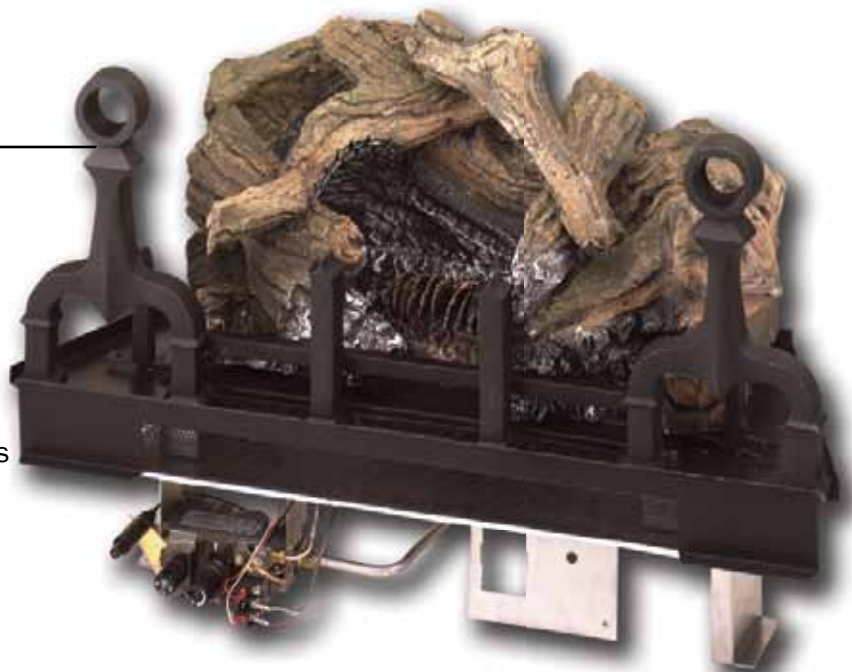

WELCOME HOME TO WARMTH

About VersaFire®

After 20 years of design and technological improvements, gas fireplaces of even just a few years ago pale in comparison to those being designed today. In a few more years, the same will be true when looking at today's models.

Vantage Hearth's VersaFire® makes our fireplaces "future proof" because they're upgradeable. So, when performance or appearance make your fireplace obsolete or you just want to change the look, a VersaFire® fireplace can be brought up to speed simply and inexpensively.

The "Premium's" massive split oak gas log set is a "mature" fire presentation with deep glowing coals and embers.

"Value" model burner/log modules feature split oak ceramic fiber logs in a "campfire" style arrangement.

"Performance" models include split oak logs and burnt down remnants with a random look.

Easy Installation

The Value, Performance and Premium burner designs are all sized to fit the mounting recess in the common fireplace chassis.

The burner is easily secured to the hearth floor with a series of perimeter screws.

The fully unitized log set is then placed snugly over the burner. The system is just as easily removed and replaced with a new burner and log set.

Value

Vantage Hearth's "Value" fireplace system leads the way in the direct-vent category of our exciting VersaFire® Series with campfire style logs, a beautiful glowing ember bed, and glowing highlights. The "Value" is an exceptional system with an impressive flame presentation and is the ideal match for today's energy-efficient homes.

Performance

The "Performance" is the centerpiece of our VersaFire® Series and features random split oak logs and remnants with exquisite detail and glow. Note the random multi-tiered flame pattern and realistic glowing ember bed burner...plus real woodburning log grate with andiron enhancers.

Our hinged, toolless entry door swings open for easy cleaning and never needs adjustment.

Premium

Fully loaded and truly impressive, Vantage Hearth's "Premium" is the flagship product of our VersaFire® Series, and sets tough new standards for any gas fireplace. The innovative "Premium" captures all the latest visual and functional technologies, features and conveniences available. Premium models feature beautiful cast iron grate treatments and andirons.

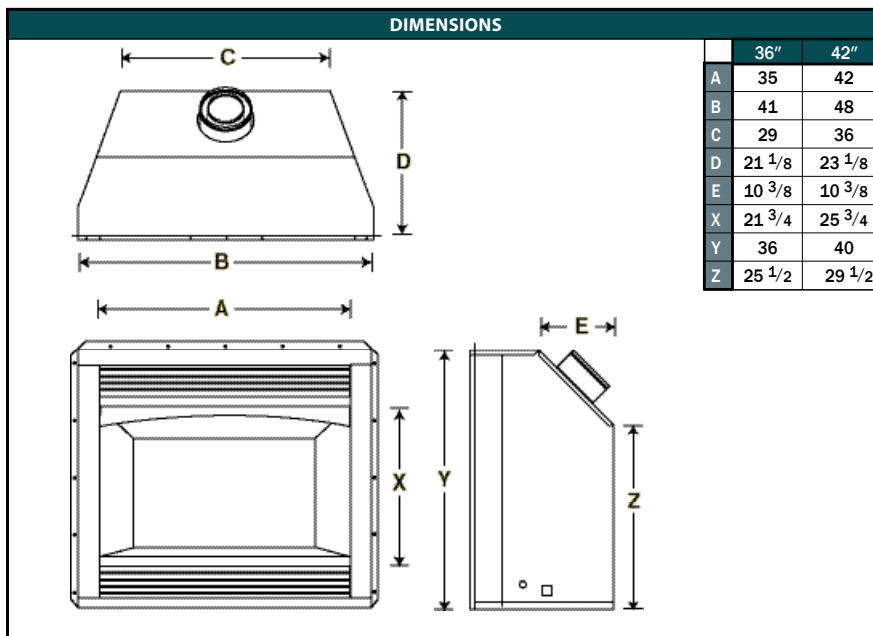

Flex gas connector, shut-off valve and pre-wired "J" box are all standard.

VersaFire® Direct-Vent Fireplace Systems

PRODUCT SPECIFICATIONS

MODEL	DESCRIPTION	SHIPPING WEIGHT
VERSAFIRE® UPGRADEABLE FIREPLACE SYSTEMS		
VTC36N1/P1	36" Value Direct-Vent Fireplace w/Rolled Louvers, Millivolt	120.0 lbs.
