Perfect Blend of
Beauty and
Performance

Stylish extras for homeowners...Better value for builders

FIREPLACES
FOR BUILDERS
Fmi

Timeless Beauty— And The Latest Technologies

Fmi's new clean-faced Sentinel is a clear departure from typical direct vent gas fireplaces. Although most direct vents include an excess of visible sheet metal and louvers, every effort was exhausted to make the Sentinel look like a real wood burning fireplace; with features and benefits homeowners will love!

Homeowner Highlights:

- **Distinctive Looks**—The combination ceramic ember bed / steel tube burner system creates lively, colorful flame patterns and a deep smoldering glow only a real wood fire could match. The dramatic flame picture is enhanced by the industry's finest refractory brick liners for incomparable masonry realism.
- **Massive Viewing Area**—The Sentinel's tall profile captures the industry's largest glass viewing area in both 36" and 42" size categories.
- **Operation and Maintenance are a Breeze**—Operates from wall switch or included remote control.

Builder Benefits:

- **Simple, Secure, and Straight Installation**—Sentinel's include fully unitized logsets for ease of installation, and they frame straight and sturdy every time with full-length drywall stopping nailing flanges.
- **Venting Options**—The top direct vent configuration of the Sentinel provides a wide variety of convenient venting options using our 5" / 8" coaxial chimney system.
- **More Standard Features**—Hand-held remote, tough powder coat finish, flex gas connector and shut-off valve are all standard.

Sentinel Direct Vent Fireplace Product Offering		
Model No.	Description	BTU Rate
