T32 and TC36 Model Series

Unique
Combination Of
Beauty, Value, and
Convenience

Stylish extras for homeowners...Better value for builders

FIREPLACES
FOR BUILDERS
Fmi

Classic Beauty— And The Latest Technologies

Fmi's **Tudor** direct vent gas fireplaces are the ideal match for today's energy-efficient homes. The Tudor leads the way in the direct vent gas category of our exciting Renaissance Series, which features a variety of looks and features... plus beautiful features homeowners will love!

Homeowner Highlights:

- **Distinctive Looks**—Features new, upgraded burner with random dancing yellow flame pattern and realistic glowing ember bed; plus exquisite new split oak ceramic fiber logs in a “campfire” arrangement with charred features and glowing highlights.
- **Flexibility**—All Fmi Renaissance Series direct vent fireplaces are built on a common chassis and burner platform. The *VersaFire*® modular design allows the homeowner to upgrade the burner and log system at any time.
- **Choices**—(36”) Tudors are available with attractive clean-faced screen, or premium rolled louvers with chain mesh pull screens. Millivolt and electronic ignition units are both available, as are natural gas and propane fuel options and your choice of painted black interior or refractory brick liners.
- **Massive Viewing Area**—The Tudor's tall profile captures the industry's largest glass viewing area in both 32” and 36” size categories.
- **Operation and Maintenance are a Breeze**—Operates from wall switch or remote control. Hinged door swings open for easy maintenance and never needs adjustment.

Builder Benefits:

- **Modular Design**—Fmi's unique *VersaFire*® platform allows the builder to install fireplace chassis' in the framing stage, without having to set the burner and log system until finish. This minimizes job site loss or damage, with the flexibility of upgrading models right up to closing.
- **Simple, Secure, and Straight Installation**—Tudors include fully unitized log sets for ease of installation, and they frame straight and sturdy every time with full-length drywall stopping nailing flanges.
- **Venting Options**—The Tudor's 45° slant back design lets you choose between horizontal and vertical venting of our 5” – 8” pipe for painless installation in any location.
- **More Standard Features**—Tough, powder coat finish, Flex gas connector, shut-off valve and pre-wired “J” box are all standard.

T32N-A includes attractive stamped steel louvers and textured powder coat finish

TC36N features premium rolled louvers with millivolt ignition new ungraded logs and burner
