Stylish extras for homeowners...Better value for builders

FIREPLACES
FOR BUILDERS
Fmi

Stunning Looks, Outstanding Performance

America is moving outdoors. And the new *Venetian* Mosaic Masonry™ vent free fireplace is the ultimate compliment to any outdoor room or patio. It's the easiest, most space efficient way to install a rich, real masonry outdoor fireplace. And it has a host of beautiful new features homeowners will love!

Homeowner Highlights:

- **Unparalleled beauty**—These unique fireplaces feature enormous firebox dimensions with a smooth style face in beautiful brushed stainless steel. When finished flush to the opening, the absence of any visible sheet metal creates the foundation for a true masonry hearth presentation.
- **Masonry Firebrick Liner**—Fmi's Mosaic Masonry™ firebrick lining system positions our Grand Masters Series as the only real masonry, factory built and lab certified fireplaces! The beautiful firebrick kit is indistinguishable from site-built masonry and is available in both traditional Warm Red and Ivory.
- **Uncompromising quality**—Fmi uses only the finest appliance grade stainless steel and kiln-fired clay firebrick. Quality checks at each level of production assure a quality product every time.

Builder Benefits:

- **Reliability and Versatility**—Despite the authentic, site-built masonry appearance; The Venetian is actually an ANSI Z21.91 "zero clearance" certified fireplace. This means flexible installation options and guaranteed performance. And... it's approved for indoor as well as outdoor use.
- **Masonry Firebrick Liner**—The patented Mosaic Masonry™ firebrick kit is a complete masonry lining system of pre-engineered, steel reinforced, kiln fired clay firebrick walls that install as easily as typical factory-built concrete liners, but finish just like site-built masonry. They're even factory grouted to minimize site installation time.
- **Economical and Versatile**—When you eliminate all that venting and chase construction installation costs come way down. And without any venting to worry about, they're versatile, enough for smaller, unconventional or restricted lots.

The Grand Masters Series
